TRUSTED STEWARDS OF IDAHO'S RESOURCES, FROM MAIN STREET TO MOUNTAIN TOP

2015 ANNUAL REPORT

Camas Prairie [along old Highway 7] – Photo by Robert Millage

MESSAGE FROM THE DIRECTOR

There is no such thing as a routine year at the Idaho Department of Lands.

We set high expectations and welcome new challenges so that unique accomplishments emerge at the end of a year.

The year 2015 was no exception.

Hundreds of fire personnel and staff from all parts of the agency contributed to helping manage one of the most destructive fire seasons Idaho has experienced in many years.

We put together a solid plan for conserving sage-grouse habitat on endowment lands and for activities covered by other IDL regulatory and assistance functions.

We successfully auctioned dozens of cottage site lots, bringing us even closer to fully executing the direction of the Land Board to divest the lake lots over time. The sale proceeds will be redirected to assets that produce higher financial returns for the endowment beneficiaries we serve.

Teams of experienced foresters and other land management personnel facilitated the harvest of more than a quarter of all the timber harvested in Idaho in a single year, and they expeditiously pulled together timber sale packages that retrieve value from charred trees in order to make more money for public schools and give new life to burned forests through reforestation.

We finalized a grazing program business plan and kicked off a yearlong process to engage stakeholders in reviewing the rate ranchers pay to graze livestock on endowment rangelands.

Working with the Endowment Fund Investment Board, we made a lot of progress carrying out the direction of the Land Board to be more strategic in our management of the endowment lands and funds as one.

Of course, we met twice as many goals for ourselves internally that don’t grab headlines. Those efforts to improve our processes and procedures move us closer to meeting our mission and vision.

These accomplishments are making a difference. The Idaho Department of Lands plays an important role in supporting jobs and Idaho’s economy through the active management of endowment lands. The revenue from the activity helps fund public schools and other State of Idaho institutions, partly easing the task of Idaho taxpayers to fund them. In our host of regulatory and assistance functions, we help protect and sustain Idaho’s natural resource economy.

We’re not finished. As an outfit that takes pride in productivity, we will perpetually reexamine our goals and embrace unforeseen hurdles to deliver positive results for the beneficiaries and customers we serve.

TOM SCHULTZ | Director

PHILOSOPHY

The Idaho Department of Lands: Trusted stewards of Idaho's resources, from main street to mountain top.

OUR VISION

The Idaho Department of Lands will be the premier organization for trust management, service, and regulatory oversight in the western United States.

We will invest in Idaho's resources to maximize financial returns to the endowment trust beneficiaries and enhance the health and resilience of Idaho's natural resources for the benefit of all Idahoans.

We will deliver programs with professionalism and integrity, providing exemplary service to the citizens of Idaho.

We will invest in our employees and have an organizational culture and framework that equips, entrusts, and expects employees to make decisions.

The Idaho Department of Lands will be a unified and vibrant organization in which all employees participate in constructive communication to fully meet our missions.

OUR MISSION

To professionally and prudently manage Idaho's endowment assets to maximize long-term financial returns to public schools and other trust beneficiaries and to provide professional assistance to the citizens of Idaho to use, protect and sustain their natural resources.

EXECUTIVE LEADERSHIP

TOM SCHULTZ – Director // **DAVID GROESCHL** – State Forester; Deputy Director, Forestry and Fire Division // **DIANE FRENCH** – Deputy Director, Division of Lands and Waterways
BOB BRAMMER – Chief Operations Officer // **DONNA CALDWELL** – Administrator, Support Services Division // **ANDREA RYAN** – Human Resource Officer

IDAHO STATE BOARD OF LAND COMMISSIONERS

The Idaho State Board of Land Commissioners [*Land Board*] consists of Idaho’s Governor, Secretary of State, Attorney General, Superintendent of Public Instruction, and State Controller.

In 1890, Idaho became the forty-third state of the Union. At that time, Congress granted millions of acres of land to the new State of Idaho for the sole purpose of funding specified beneficiaries, primarily the state’s public schools.

The mandate was included in the Idaho Constitution, which states the lands will be managed “in such a manner as will secure the maximum long-term financial return” to the beneficiary institutions.

The Land Board members are the stewards of state endowment trust lands in Idaho and the tens of millions of dollars in revenue that are generated for the trust beneficiaries from the use of the lands, along with nearly two billion dollars of endowment funds.

The Idaho Department of Lands and the Endowment Fund Investment Board carry out the executive directives of the Land Board to meet its constitutional trust mandate and other duties.

Under the direction of the Land Board, the Idaho Department of Lands also administers Idaho’s public trust lands - the lands beneath the beds of Idaho’s navigable lakes and rivers - for the benefit of all Idahoans, and provides service and assistance to Idahoans through forestry and fire management programs.

The Land Board also oversees the Idaho Board of Scaling Practices, the Clearwater-Potlatch Timber Protective Association, and the Southern Idaho Timber Protective Association.

In November 2014, **Lawrence Denney** was elected Idaho’s new Secretary of State and **Sherri Ybarra** was elected Idaho’s new Superintendent of Public Instruction. They took office in January 2015.

ENDOWMENT FUND INVESTMENT BOARD

The nine-member Endowment Fund Investment Board [EFIB] manages, on behalf of the Land Board, the investment of a perpetual endowment fund whose original source is land sale proceeds and the reinvestment of income generated by Idaho endowment trust lands. A staff of four people in Boise assists the EFIB in overseeing the fund and the outside investment managers who make the day-to-day investment decisions. Members of the EFIB are appointed by the Governor and confirmed by the Senate.

LAND BOARD COMPREHENSIVE STRATEGY REVIEW

Implementation of the Land Board’s Comprehensive Strategy Review [*completed in late 2014*] proceeded in earnest in 2015. An outside expert began evaluating IDL’s current holdings of commercial buildings in Idaho to determine the most prudent strategy to manage or dispose of the properties. Other outside experts were identified to review and independently confirm major land investment decisions. A subcommittee of IDL and EFIB representatives began meeting to advise the Land Board on investment issues that impact both the endowment land and the

endowment fund. A newly-constituted Land Board Audit Committee identified information associated with land management that will be verified by outside auditors annually. The EFIB approved a plan to begin investing in two large pools of premier U.S. commercial real estate which, over time, will improve diversification of the endowment fund and move its asset mix from the current 70% stocks/30% bonds to 66% stocks/26% bonds/8% commercial real estate.

THE ENDOWMENT BENEFICIARIES

HISTORY OF ENDOWMENT DISTRIBUTIONS

Idaho’s public school system is the primary beneficiary of state endowment trust lands.

All constitutionally designated funds and their beneficiaries are:

- Public School Endowment Fund
 - Agricultural College Fund *[at the University of Idaho]*
 - Charitable Institutions Fund *[benefiting Idaho State University, State Juvenile Corrections Center, State Hospital North, Idaho State Veterans Homes, and Idaho School for the Deaf and Blind]*
 - Penitentiary Fund
- School of Science Fund *[at the University of Idaho]*
 - State Hospital South Fund
 - University Fund *[at the University of Idaho]*
 - Normal School Fund *[benefiting the Idaho State University Department of Education and Lewis-Clark State College]*
 - Capitol Permanent Fund *[benefiting the Capital Commission]*

SUPPORT FUNCTIONS

Vital to the smooth operation of the entire department — including the Land Board and the Oil and Gas Conservation Commission — are the dedicated people who perform functions that support all divisions and operations within the agency.

INFORMATION TECHNOLOGY

The Information Technology *[IT]* team supports agency operations by implementing and supporting cutting edge internal and public-facing enterprise systems. The IT team also manages the agency’s computing infrastructure and records management functions.

FISCAL MANAGEMENT

Under the supervision of the financial officer, the fiscal section provides oversight and policy direction for all accounting functions within the department, including accounts payable and receivable, payroll and internal auditing.

PROCUREMENT

There are few other State of Idaho agencies that rely more heavily on the private sector to complete its work than IDL. Procurement staff in 2015 solicited, evaluated, and awarded \$10.2 million in contracts and purchase orders with the private sector to carry out the agency’s work.

HUMAN RESOURCES

Staff members in the Human Resources department support the agency in the areas of development, recruitment, retention, benefits and compensation. They ensure compliance with federal and state laws and provide value-added services in the areas of training, performance management, facilitation, and employee relations.

PUBLIC INFORMATION

Two Public Information Officers manage the agency’s many communication needs for internal and external audiences, including the news media. They also oversee the dissemination of public information for wildfires burning in State of Idaho protection areas.

DIRECTOR’S OFFICE

Staff members who provide administrative support in the Director’s Office are responsible for a variety of duties including supporting the director and executive staff and coordinating details and materials related to Land Board and Oil and Gas Conservation Commission meetings.

STRATEGIC PLANNING

A Strategic Planning Manager oversees the development of a strategic plan that, in part, identifies strategies, performance metrics, and outcomes to allow IDL to prioritize resources and measure its performance.

REAL ESTATE SERVICES

A Real Estate Program Manager facilitates land exchanges and land transactions involving endowment lands. An appraiser oversees contracts with third party appraisers to determine the market value of endowment lands. Right-of-way agents secure rights of way and easements to improve access to endowment lands statewide. Land Records staff members maintain the property ownership databases and records for lands under the agency’s management.

GEOGRAPHIC INFORMATION SYSTEMS

A team of Geographic Information System *[GIS]* analysts design, develop and implement GIS applications, geodatabases and process-automation tools to provide IDL managers with working solutions to their spatial data collection, analysis and reporting needs.

INTERDISCIPLINARY TEAM

The Interdisciplinary Team is the cadre of technical specialists in hydrology, wildlife biology, fish biology, and geotechnical engineering that provide advice and technical assistance to endowment trust land managers across Idaho. They help ensure that management activities maintain wildlife habitats, protect ecological integrity, comply with water quality standards, and work in harmony with diverse geological settings.

ENDANGERED SPECIES

IDL weighs in on any proposed federal listings of species in Idaho that will affect management of endowment trust lands. Species listings can present constraints and uncertainty in land management. IDL is proactive in providing researched, science-based reviews and inputs to help ensure sustainable active management is supported on state endowment lands in compliance with needed habitat protections.

FORESTRY REGULATION & ASSISTANCE

The IDL forestry assistance professionals provide technical assistance to forest landowners, organizations, other IDL programs, and local, state and federal agencies.

These specialists in forest management, entomology, pathology, community forestry, and fire advise and assist forest landowners and managers, urban foresters, and consulting foresters in the responsible management of forest resources and enforce the policies set forth by the Idaho Forest Practices Act, which regulates commercial forest operations within Idaho.

Many bureau programs are funded through partnerships with the USDA Forest Service, State and Private Forestry program.

Boehls Camp, Floodwood State Forest

CY/FY 2015 HIGHLIGHTS

IDAHO FOREST PRACTICES ACT ADMINISTRATION

The IDL administers the Idaho Forest Practices Act *(FPA)*, a law created in 1974 to promote active forest management and ensure the health of forest soil, water, vegetation, wildlife, and aquatic habitat is maintained during the growing and harvesting of forest trees in Idaho.

- Number of forest practices notifications: 2,427
[If forest owners plan to conduct a forest practice, they must notify IDL of planned activity]
- IDL private forestry specialists conducted 1,480 forest practices inspections on 1,239 different harvesting operations on Idaho's private forestlands and found a 98 percent rate of compliance with rules.

FOREST STEWARDSHIP

Across the state, IDL Private Forestry Specialists provide advice to private landowners on management planning, timber harvest, reforestation, thinning, and many other forest issues.

- Technical assists to private forest landowners: 1,084
- Developed 89 new or revised Forest Stewardship Plans on 20,843 acres.
- Collaborated with the USDA Natural Resources Conservation Service and Farm Service Agency to conduct 1,162 acres of forest improvement practices on private lands.
- Provided education to more than 8,029 private forest landowners and forest managers through cooperative partnerships with University of Idaho Extension Forestry, Washington Department of Natural Resources, USFS-Forest Health Protection and many others.

- Provided funding to facilitate forestry education for 228 teachers at Project Learning Tree workshops.
- Partnered with more than 215 forestry professionals and volunteers from multiple entities to fund and facilitate the Idaho State Forestry Contest, a field education and forestry skills competition. More than 455 elementary, middle, and high school students participated in the event.

FOREST HEALTH

Insect infestations and diseases can present major health problems for Idaho forests. Bureau staff members provide technical assistance and training to forest landowners and managers, designed to minimize risks and hazards from insects and diseases. Focus is on prevention, suppression, and restoration of forests before, during, and after an insect or disease outbreak.

- IDL conducted three pest detection surveys on state and private lands covering 5,822,417 acres, including an aerial detection survey *[4,084,981 acres]*; gypsy moth survey *[1,648,887 acres]*; and a Douglas-fir tussock moth survey *[88,549 acres]*.
- IDL responded to 249 requests for forest health information.
- IDL, in partnership with USFS-Forest Health Protection and University of Idaho Extension Forestry, conducted 97 insect and disease identification and management training sessions, educating 3,606 participants.

URBAN AND COMMUNITY FORESTRY

In our communities, trees reduce air and noise pollution, conserve water, save energy, reduce soil erosion, beautify areas, enhance economic vitality, and improve human health. Bureau staff members support and assist communities that want to develop or improve a community forestry program.

continued...

URBAN AND COMMUNITY FORESTRY

- The Treasure Valley Canopy Network *[TVCN]* – a diverse group of professionals from business, government, academia and non-profits—is using geospatial tree canopy data and benefit modeling tools developed by IDL for projects that reduce storm water, conserve energy, and improve air quality and overall community health.
- IDL is partnering with Idaho Power, national, state and local organizations and Treasure Valley cities on an Energy Saving Trees Program. Trees are provided to homeowners to plant in specific locations to maximize shading on buildings during the hottest times of the year, lowering energy use and saving money. More than 4,100 shade trees have been planted to date through this program.
- IDL purchased a web-based community tree inventory program for use by Idaho cities, providing them with an important planning and management tool. It also allows IDL to roll-up data statewide, increasing understanding of the structure, extent, benefit value, and potential risk from invasive species for the state’s community forests.

FOREST LEGACY

Many private forest landowners face economic pressure to convert their lands to uses that will forever remove them from the forested land base. The IDL administers a federally-funded Forest Legacy Program, providing funds to purchase conservation easements *[CE]* on private lands that might otherwise be developed and lost as productive forests. The primary objective is to keep working forests working.

2015 program accomplishments *[all projects located in northern Idaho]:*

- Closed on four landowner CEs containing 1,453 acres as part of the FY12 Boundary Connections project, with due diligence work completed on one additional landowner CE containing eight acres. This final Boundary Connections CE is expected to close in early 2016.
- Due diligence work in progress for three projects:
 - FY14 McArthur Lake East containing 8,000 acres
 - FY15 Clagstone Meadows containing 13,093 acres
 - FY15 Hall Mountain containing 1,256 acres
- The FY16 Hall Mountain-Kootenai Valley project containing 3,281 acres ranked third nationally. Funding for this project will be allocated through the recently passed 2016 federal budget.

COHESIVE STRATEGY

The National Cohesive Wildland Fire Management Strategy coordinates the efforts of federal, state and local partnerships. The three tenants of the strategy are to restore and maintain resilient landscapes, create fire-adapted communities, and strengthen wildfire response.

- *Southern Idaho Cohesive Strategy [Elmore County]*
Restore a resilient sagebrush steppe by implementing a National Cohesive Wildland Fire Management Strategy *[Cohesive Strategy]* project in rangelands in southern Idaho.
- *Good Neighbor Authority in Idaho*
Explore options to work across borders with our federal partners to increase the pace and scale of management on our national forests in Idaho.

COMMUNITY FIRE PROGRAM

Fire resiliency not only applies to the vegetative components associated with the many landscapes found throughout Idaho, but also to the communities and individuals that call these same areas home. IDL supports a wide range of activities related to modifying vegetation, planning, and education to reduce wildfire impacts on communities.

- Four counties *[Boundary, Bonner, Lemhi and Bonneville]* and one special service district *[Idaho Soil and Water]* received Hazardous Fuels Reduction funding to reduce fuel loads on private lands. Projects are adjacent to areas where similar efforts are being undertaken by various units of the USDA Forest Service.
- Three counties *[Bear Lake, Kootenai and Shoshone]* were selected through the Western Fire Managers competitive process to receive funds to reduce fuels on private lands.

IDAHO BOARD OF SCALING PRACTICES

The Idaho Board of Scaling Practices enforces log scaling *[measurement]* standards prescribed by statute and regulation, to ensure professional quality log scaling for the benefit of Idaho timber interests. The board tests and licenses log scaling practitioners and subjects them to routine, unannounced check scales to assure proficiency. The board also administers log brand registrations and the disposition of prize *[abandoned]* logs.

An executive director and check scaler, headquartered in the Idaho Department of Lands Coeur d’Alene Staff Office, carry out the board’s directives. Funding for the board is derived from assessment fees levied on the scale of forest products harvested within the state and from licensing and registration fees.

Appointed by the Governor, board members represent industry, logging, and private landowner interests.

RUSSEL [RUSS] HOGAN

FIRE MANAGEMENT

Fire management responsibilities are one of the most visible of our functions.

On a day-to-day basis IDL establishes and implements policies to prevent, prepare for, and fight wildland fires on more than six million acres of state and private forest and rangelands in Idaho.

These responsibilities include regulating the elimination of fire hazards caused by timber harvesting on state and private lands. In FY15, IDL fire wardens inspected 2,427 compliances related to this responsibility. Our duties also include issuing fire safety burn permits to individuals living outside city limits anywhere in Idaho, who plan to burn for any reason—including crop residue burning and excluding recreational campfires—during closed fire season. In calendar year 2015, IDL issued 9,235 fire safety burn permits, with the help of the online resource: BurnPermits.Idaho.gov

The department’s work in fire management helps protect and preserve important endowment timber assets as well as millions of acres of private forestland.

The department also enhances forest and rangeland management on state endowment trust lands by utilizing fire as a management tool, while protecting local communities from wildfire by reducing fuels.

CHIEF FOCUS OF IDL MANAGED FIRES IS INITIAL ATTACK

PUT OUT FIRES AS QUICKLY AS POSSIBLE	PROTECT RESOURCES	MINIMIZE SUPPRESSION COSTS
--	----------------------	----------------------------------

FIRE PROTECTION DISTRICTS

Wildfire response in Idaho primarily is organized by IDL, the U.S. Forest Service and the Bureau of Land Management. The IDL and two timber protective associations have lead fire response duties on 12 forest protection districts that cover 6.3 million acres of land owned mostly by private entities and the State of Idaho. The districts, with the support of the Fire Management Bureau, promote and carry out the work of the IDL fire management program. Federal land management agencies provide fire protection on the majority of their lands statewide.

■ FEDERAL ■ STATE ■ OTHER ■ RFPA BOUNDARIES

Walker Fire near Idaho City

2015 FIRE SEASON HIGHLIGHTS

Broke record for total cost of fire season. Sixteen fires in IDL protection required the use of 27 interagency incident management teams, the most IDL ever used in one fire season.

Hosted fire safety training for loggers and other contractors mid-season in order to make more on-the-ground private resources available to fight fire.

Rare large-scale closure of endowment land for fire safety *[11,248-acre block in Silver Valley]*.

Extended “closed fire season,” requiring fire safety burn permits past October 20.

Worked with industry to put in place voluntary measures for loggers in areas covered by stage 2 fire restrictions.

Required extra steps for agricultural burners in northern Idaho.

Put firewood cutting limitations in place on endowment lands in areas covered by stage 2 fire restrictions.

Received 3,080 “man days” of help from Canadians through the Northwest and Northeast Firefighting Compacts.

Will salvage 83.5 mmbf of timber killed by fire in 2015 across 6,000 acres of endowment land. Eighty percent of salvaged timber will come from Idaho County. *[Note: These harvest figures and receipts will be reflected in FY16 statements]*

Coeur d’Alene Interagency Fire Cache processed more than \$45 million in transactions to provide supplies to 251 fire incidents in Idaho and nationally. Business volume at the cache doubled in 2015.

At the end of calendar year 2015, approximately 230 ranchers were members of six different rangeland fire protection associations *[RFPA]*. Two additional areas were working toward being operational by the 2016 fire season. The RFPAs contributed to fighting 30 fires in 2015.

MINERAL LEASING

The IDL manages 3.3 million acres of state-owned mineral rights, which are the subsurface rights to any mineral. Since 1923, state law has required the State of Idaho to reserve the mineral rights when state land is sold to a private party. Therefore, of the 3.3 million acres of state-owned mineral rights, about 2.4 million acres of the surface rights also are owned by the state. The rest of the surface above the mineral rights has other surface ownership.

In 2015, IDL administered 174 Mineral Leases and 53 Exploration Locations. Exploration Locations are similar to federal mineral claims, and allow for mineral entry, meaning a claim can be staked on them. This allows the locator the right to explore for minerals, and decide if the minerals have economic value and would be worth mining.

Minerals that directly generate royalty revenue for the state endowment trust include aggregate *[sand, gravel, stone, cinders]* and metals. Sand and gravel continue to be the main source of mineral revenue to IDL.

COTTAGE SITE AUCTIONS

The Idaho Constitution requires a public auction for the disposal of state endowment trust land by sale. In 2010, the Land Board approved a plan to divest the state's ownership of most of the cottage sites at Priest Lake and Payette Lake over time and reinvest the proceeds in other assets.

The auction for ownership of leased cottage site lots is voluntary, meaning the lessees of the lot nominate their leased sites for public auction. The state can accept no less than the appraised value of the lot at auction. If the winning bidder for a leased lot is not the lessee, the individual must pay the lessee for the appraised value of the privately owned improvements on the lot.

In October 2014, the Land Board approved one voluntary auction for ownership at each lake annually for 2015, 2016, and 2017, for a total of 180 leased lots that will be auctioned before the end of 2017.

By the end of 2017, it is expected the State of Idaho will have divested two-thirds of its ownership in Priest Lake and Payette Lake cottage sites through the voluntary auction for ownership process.

AT PAYETTE LAKE

COTTAGE SITE LEASING

The State of Idaho owns thousands of acres of state endowment trust land on the shores and upland of two of Idaho's most beautiful lakes - Priest Lake in northern Idaho and Payette Lake in west central Idaho.

At the end of FY15, more than 365 individuals and families leased the lots, known as cottage sites, from the endowment trust.

The endowment trust owns the land and the cabins built on the land are owned by the lessees as personal property. In many instances, the lots have been leased by the same families for many generations.

GRAZING, AGRICULTURE & CONSERVATION LEASING

The IDL manages 1,159 grazing leases that cover 1,788,787 acres of state endowment trust land located primarily across the southern two thirds of Idaho.

These leases contribute an estimated 258,640 animal unit months [AUM] of forage to livestock operations for this year.

Most of the original farming land owned by the endowments was sold during the 1900s. What remains is a small portfolio of farming leases that total approximately 19,519 acres. Crops currently grown on state endowment trust lands include wheat, barley, potatoes, hay, corn, sugar beets, dry beans, hops, lentils, chickpeas, rape seed, organic corn, organic barley, and organic alfalfa hay.

The IDL also manages a small portfolio of conservation leases. The leases are developed to allow resource preservation, view preservation, wildlife management, and other conservation practices without diminishing the potential lease revenue for the endowed beneficiary.

CONFLICT LEASE AUCTIONS

In calendar year 2015, IDL held six conflict lease auctions for expiring grazing leases. Less than six percent of total grazing leases were conflicted in 2015.

If more than one person applies to lease the same land, then the lease is auctioned to the applicants at a “conflict auction.” Conflict lease auctions are only available to the conflicting applicants.

GRAZING PROGRAM REVIEW

In 2015, IDL continued a review of the grazing program.

The IDL routinely evaluates management strategies for all endowment trust land assets in order to ensure the Land Board is meeting a constitutional mandate to maximize long-term financial returns on the use of the lands.

To that end, in 2014, IDL started a process of drafting a grazing program business plan to improve the long-term financial performance of the rangeland asset. The process included extensive public outreach in 2014, including a public comment period that was open through January 30, 2015. The final grazing program business plan was presented to the Land Board in May, and it constitutes a strategic management plan for the grazing program.

A group of various stakeholders was identified to advise the subcommittee. The review process will continue through 2016 with public meetings across the state and a public comment period. The advisory group will develop the recommended alternatives for subcommittee review. A final recommendation to the full Land Board is expected in the fall of 2016.

LAND BOARD SAGE-GROUSE PLAN

The Land Board and the Oil and Gas Conservation Commission approved a plan in April outlining additional measures to conserve sage-grouse in Idaho.

The Land Board’s Greater Sage-Grouse Conservation Plan includes enforceable stipulations in leases, permits, and easements on endowment lands. It also spells out recommended best management practices for activities pertaining to IDL’s role in supporting fire prevention, suppression, and rehabilitation, and regulating oil and gas development, some mining activities, and abandoned mine reclamation.

IDL created the plan because a federal listing of the bird would inhibit revenue generating activities on more than 600,000 acres of endowment rangelands. It also would constrain development activities that IDL regulates on privately owned land. Before it was approved, IDL collected comments on a draft plan from the public, including from natural resource industry user groups, environmental organizations, and relevant state and federal agencies.

Later in 2015, the U.S. Fish & Wildlife Service announced that listing sage-grouse under the Endangered Species Act was “not warranted.” Shortly after, Governor Otter and the Idaho Legislature filed a lawsuit challenging the federal government’s process behind amendments to federal land-use plans.

In the fall of 2015, the Land Board reaffirmed its commitment to implementing its Sage-Grouse Conservation Plan despite the unknown outcome of the legal challenge to the federal government’s decision on sage-grouse.

IDL manages
441 OIL & GAS LEASES
that cover **69,536 acres**
[End of FY15]

OIL & GAS LEASING

The IDL manages about 3.3 million acres of state-owned oil and gas rights, and leases these rights to explore and potentially produce oil and gas through competitive bidding at public auctions, with oversight and approval by the Land Board. Oil and gas rights owned by the state endowment trust are leased to make money for public schools and other specified endowment beneficiary institutions. IDL also leases oil and gas rights owned by the Idaho Department of Fish and Game, the Idaho Transportation Department, and the public trust *[the rights submerged below the ordinary high water mark of navigable streams and rivers within the state]*.

IDAHO OIL & GAS CONSERVATION COMMISSION

The Idaho Oil and Gas Conservation Commission regulates the exploration, drilling, and production of oil and gas resources in Idaho to ensure the conservation of oil and gas and the protection of surface and groundwater.

FY15 HIGHLIGHTS

- 1** NEW EXPLORATION PERMIT ISSUED
- 1** NEW DRILL PERMIT ISSUED
- 17** ACTIVE DRILL PERMITS
- 14** WELLS READY FOR DEVELOPMENT OR ALREADY IN DEVELOPMENT
- 1** WELL IN PRODUCTION

[as of June 30, 2015]

Between July 1, 2015, and Dec. 31, 2015, 2 more drill permits were issued and 1 expired. At the end of CY15 there were 18 active drill permits, 9 wells ready for development or already in development, and 6 wells in production.

CHANGES TO IDAHO'S RULES PERTAINING TO CONSERVATION OF CRUDE OIL AND NATURAL GAS, OR IDAPA 20.07.02, WERE APPROVED BY THE IDAHO LEGISLATURE IN 2015.

The year 2015 presented learning opportunities for the commission, department, industry and the public, particularly with maneuvering the process for integrating mineral owners to provide for orderly development and conserving oil and gas resources. I am confident that the regulatory processes for oil and gas, including integration, will be improved moving forward because of what we learned.

MINING REGULATION & ASSISTANCE

The IDL administers the Idaho Surface Mining Act and the Idaho Dredge and Placer Mining Act on all state, private, and federal lands in Idaho. Mining plans and reclamation bonds are required prior to the start of mining activity regulated by these laws. Plans are reviewed and approved in coordination with other state and federal agencies.

The IDL also provides financial and technical assistance to land owners across Idaho with abandoned mine issues. Public safety and environmental protection are the focus of the abandoned mine lands program, which is funded by a portion of the Mine License Tax.

FY15 HIGHLIGHTS

1,528 SURFACE MINING RECLAMATION PLANS
24 PLACER MINING PERMITS

IDL staff assessing risk of abandoned mines
at the Gilmore District in Lemhi County

PUBLIC TRUST LAND MANAGEMENT

The IDL and Land Board administer public trust lands – the beds and banks lying below the ordinary high water mark of the state’s navigable lakes, rivers and streams.

In that capacity, IDL is the administrator of the Idaho Lake Protection Act and regulates encroachments and activities on, in, or above the navigable lakes in the State of Idaho. Examples of encroachments permitted by the IDL include docks, marinas, and float homes.

Additionally, IDL administers the leasing of riverbed public trust lands for minerals and processes disclaimers of interest and easements along navigable rivers. These lands are managed for the public’s benefit, not for a specific beneficiary.

FY15 HIGHLIGHTS

PUBLIC TRUST PROGRAM

- 179** ACTIVE SUBMERGED LAND LEASES [E.G. MARINAS]
- 25** NEW SUBMERGED LAND LEASES ISSUED
- 11,445** ACTIVE ENCROACHMENT PERMITS
- 401** NEW ENCROACHMENT PERMITS ISSUED
- 2** ACTIVE RIVERBED MINERAL LEASES
[EXCLUDING OIL AND GAS LEASES]
- 2** ACTIVE EXPLORATION LOCATIONS ON NAVIGABLE RIVERS

ACCOUNTANT’S STATEMENT

We have examined and prepared the data presented in this annual report in accordance with generally accepted accounting standards and affirm it is true and accurate and reflects the activity of the Idaho Department of Lands and the State Board of Land Commissioners during fiscal year 2015.
